GENERAL SYSTEM INFORMATION

Description of the Sewer System

The City of Alhambra's Utilities Department sanitary sewer system is made up by 129 miles of pipe, 2800 manholes, and seven lift stations with 7,800 feet of forced mains.

DESCRIPTION

The City's intent is line the sewers mentioned as a permanent repair. As the City is not an expert in sewer lining design, we are seeking a consultant who can prepare options for us to consider. The Sewer System Rehabilitation Plan completed in March 2009 identified the listed four spots as severe condition for repair. These are the last four spots left on the Severe Condition List. Staff has reviewed the CCTV of these locations, and they have determined a lining project would be the most cost effective way to repair. CCTV is available for review and can be picked up at City Hall Public Works Desk.

- Cypress was two line segments with multiple long cracks recommended to line pipe from MH B4147-B4213 323ft of 12" VCP, MH B4213-B4214 325ft of 12" VCP
- Essexfells - There are two sections of this pipe run that have concrete encased cast iron pipe. The pipe is corroded. Recommend to reline MH D4083 to MHD4093 271 ft of 8" VCP
- Vega St – Multiple cracks throughout pipe run. Recommend reline pipe MHC7032- C7033 250ft of 8" VCP

- Florentina Ave (Easement)- Reline first 115' of pipe due to cracks. Line not in service after 115 ft install dead end cap there at 115' mark, there is an incorrect dead end installed at 246 two bricks in pipe.
