Note: For projects where subcontractors are doing the work on behalf of The Gas Co., permit fees are to be billed directly to The Gas Co. The subcontractor can directly pay at the counter for a business license, transportation permit and insurance processing fee.

Home Improvement & Small Construction Sites Best Management Practices (BMPs)

DO's

- ✓ Protect stockpiles and materials from wind and rain by storing them under secured plastic sheeting and/or with sandbag barriers.
- ✓ Whenever possible schedule grading and excavation projects for dry weather.
- ✓ Always cover and maintain dumpsters. Check thoroughly and frequently for leaks.
- ✓ Clean up leaks, drips and other spills immediately. This will prevent contaminated soil or residue on paved surfaces from blowing or washing into the storm drains.
- ✓ Identify and protect all storm drains, drainage swales and creeks located near the construction site to prevent pollutants from entering them.
- ✓ Use rip rap, sand bags, rocks, and/or temporary vegetation on slopes to reduce runoff velocity and trap sediments.
- ✓ Dispose of all waste properly.
- ✓ **Filter** rain-water accumulated onsite to remove dirt, sediments, and other pollutants **BEFORE** discharging.

DON'Ts

- ✗ Do not wash out concrete chutes into the street or storm drains.
- ✗ Do not throw food wrappers on the ground. [Use a trash can to dispose of food waste and wrappers.](#)
- ✗ Never clean brushes or rinse paint containers into a storm drain, gutter or street.
- ✗ Never clean a dumpster by hosing it down on-site!
- ✗ Never hose down dirty pavement or surfaces where materials have spilled. Use dry cleanup methods (e.g. absorbent materials such as kitty litter, sawdust, or cornmeal) whenever possible.
- ✗ Never use the street to stockpile dirt, sand and other construction materials that can contribute to stormwater pollution.
- ✗ Do not allow vehicles exiting construction sites to track dirt and mud to the street.
- ✗ Do not discharge **unfiltered** rain-water which may contain sediment, dirt and other pollutants.
